Product Designer with over 4 years of experience designing and optimising web and mobile experiences across consumer services, SaaS, and fintech. Skilled in end-to-end journey design, user research, interaction design, prototyping, and scalable design systems. I use research and product performance data to identify customer pain points, validate solutions, and improve measurable outcomes. Experienced in collaborating with product and engineering teams and using AI tools to accelerate exploration and prototyping. I prototype in React and Tailwind, usually build small AI apps most days, and use Figma, Cursor and Claude Code to get working versions in front of people fast.

KEY ACHIEVEMENTS

Improved customer journeys: Reduced onboarding drop-offs by **42%** at SaveInGold by identifying friction in the registration and KYC journey and bringing the process into the app.

Drove measurable product outcomes: Increased retention by **35%** and premium conversions by **25%** at WPBrigade through redesigned journeys and A/B testing.

Built scalable design systems: Introduced Figma workflows and a token-based design system at WPBrigade, reducing design handoff time by **40%**.

Improved web platform usability: Simplified Catchment's reporting data visualisations, increasing feature adoption by **22%**.

Increased B2B website conversions: Redesigned Catchment's corporate website, contributing to a **13%** increase in lead generation.

EXPERIENCE

MENA CAPITAL

Product Designer — Mar 2026 – July 2026
London, UK / Remote

Owned end-to-end design for a post-trade fintech platform spanning client management, transactions, and compliance, from problem definition through prototyping and developer handoff.

Built a reusable design system using Claude and Figma, creating design tokens, component variants, and consistent layouts.

Explored and prototyped alternative layouts for data-heavy interfaces, balancing information density, usability and clarity.

Worked with engineering and compliance stakeholders to consolidate fragmented processes into cohesive user journeys and validate designs before implementation.

SAVEINGOLD

Product Designer — Jan 2025 – Feb 2026
London, UK / Remote

Led the redesign of a consumer fintech app across iOS and Android, from user research and journey mapping to interactive prototyping and developer handoff.

Identified friction in the registration and KYC journey through UX audits, user research, and stakeholder interviews, then brought KYC into the app to reduce onboarding drop-offs by **42**%.

Defined a consistent visual language across typography, colour, iconography, component states and motion.

EDUCATION

AI in Data Analytics
BrainStation
2026

MSc Computer Science
Anglia Ruskin University, Cambridge
2023 – 2024

BSc Computer Science
University of Gujrat, Sialkot
2017 – 2021

SKILLS & CAPABILITIES

Product design
Interaction design, prototyping, visual design, user research, usability testing, information architecture, microinteractions, accessibility (WCAG).

Design systems
Figma (Auto Layout, Variants, Tokens), component libraries, type scales, spacing grids, design–engineering handoff, cross-platform consistency.

Working with code
React, Tailwind CSS, HTML/CSS, Django, used for prototyping and full-stack projects.

AI & prototyping

Catchment (Formerly SocialPro)
Product Designer — Nov 2023 – Nov 2024
London, UK / Remote

Owned design across a B2B web platform and corporate website, taking work from concept and prototyping through to developer handoff.

Simplified reporting data visualisations to make complex information easier to understand, increasing feature adoption by **22%**.

Redesigned the corporate website to improve clarity and B2B lead generation, contributing to a **13%** increase in leads.

Contributed to platform growth from approximately **250 to 532** active businesses over six months through improvements to reporting and the website.

WPBRIGADE
UX Designer — Oct 2021 – Aug 2023
Sialkot, Pakistan

Redesigned customer journeys for widely used freemium WordPress plugins, increasing retention by **35%** and premium conversions by **25%**.

Planned and evaluated A/B tests to validate design decisions and measure their impact on user behaviour and revenue.

Led the transition from Photoshop to Figma, migrating design files and onboarding the team to a more collaborative workflow.

Created a token-based design system with reusable components, typography and spacing standards, reducing design handoff time by **40%**.

Cursor, Claude, Figma Make, Google AI Studio, Lovable, Bolt, GPT-4 integration.

Collaboration
Cross-functional partnership, stakeholder management, Agile/Scrum, Jira, Notion, FigJam, Miro.

COMMUNITY

Community Support Lead, FAUX
Ongoing

Support the organisation of FAUX (Food & UX), a monthly design events community across the UK, helping shape programming and community reach alongside the founder's leadership group.

SECTORS

Fintech, healthtech, edtech, social procurement and consumer services.

FEATURED PROJECT

AI-Powered Lyric Generator
End-to-end design and build, MSc Thesis

Owned the project end-to-end, UX, frontend, and backend, taking it from problem framing to a working product. Designed the mobile experience in Figma, mapping prompting flows and running usability tests to refine the interaction model for a novel AI-driven workflow. Built the cross-platform frontend in Flutter and the backend in Django, integrating a GPT-4 model fine-tuned on a 4,000-song dataset for contextual relevance.
